EDUCATION

- **Nanyang Technological University** Singapore
Bachelor of Engineering in Computer Science with Minor in Mathematics; CGPA: 4.49/5.0 Aug. 2014 – May. 2018

EMPLOYMENT

- **SAP** Singapore
Data Scientist Intern Jan 2017 - May 2017
 - **Job & Resume Matcher:**
 - * Contributed into the development of the back-end of a recommendation engine that recommends resumes/job descriptions given a raw job description/resume document.
 - * Researched and developed Machine Learning models for various microservices within the recommendation engine, such as job category/industry classifier, job standardization, location classifier, etc.

PROJECTS

- **HiveIO:** A multi-player tower conquering game developed at NUS Hack N' Roll 2018. The game is developed in Python and Javascript and is deployed at <https://hiveio.herokuapp.com>.
- **Quora Question Pairs Classifier:** A deep learning model developed for the Quora Question Pairs challenge hosted at Kaggle. The model takes two different questions as input and predicts whether they are essentially just duplicates. The model is placed amongst the top 25% in the final leaderboard.
- **Curator:** An Android application that provides general information and events of museums in Singapore. The application uses Google Place API.

AWARDS

- **2nd Place at The ACM International Collegiate Programming Contest (ICPC) Asia Yangon Regional 2017:**
An international team-based 5-hour programming contest consisted of teams from top universities in West Pacific and South East Asia as participants.

PROGRAMMING SKILLS

- **Languages:** C++, Python, Java, Javascript
- **Technologies:** Linux, Unity, Google Cloud Engine, Keras, Scikit-Learn, Node.JS, NLTK, LaTeX
